March 18, 2020

VISITATION

In response to the current state of the nation in regards to COVID-19, Pennsylvania Psychiatric Institute like all healthcare organizations across the nation, are following the direction and guidance of our state and local authorities to ensure the safety of our patients, and staff.

**Effective March 23, visitation will be prohibited on ALL hospital inpatient areas.**

**For our outpatient sites, the following restrictions apply:**

1. All outpatients are limited to one accompanying visitor over the age of 18 years or older.
2. All visitors must be screened for symptoms of the COVID-19 disease at each site’s registration area.

We realize these changes may place additional stress on patients and families, however, we want to do all we can to limit any potential spread of COVID-19.

Patients and families are encouraged to stay in touch by calling their loved ones.
